

Smart Hostel and Mess Administration Management Information System

Team ID: 14 | Section: [S-4] | Members: [MARREDDY SAI BHAVITHA REDDY –2520030551], [Ramagiri Rishik – 2520030333], [GUMMADI HITESH –2520030370] | Guide: [Ms. M. Usha Rani]
Database Systems Engineering and Distributed Backend Development (25CS1302E) | KLH Bachupally Campus, CSE | PBL 2026-27

Abstract

- A web-based system to efficiently manage hostel rooms, student records, mess services, attendance, fees, and complaints.
- It reduces manual work, improves data accuracy, and provides centralized management for students and administrators.

Problem Statement & Objectives

- Problem: Manual hostel management.
- Objective 1: Automate records.
- Objective 2: Manage mess.
- Objective 3: Track complaints.
- Scope: Hostel & mess.

Existing vs Proposed System

Feature	Existing System	Proposed System
Records	Manual	Digital
Rooms	Manual	Automated
Mess	Offline	Online
Complaints	Paper	Online
Limitation / Gap	Errors	Automation

Feasibility Study

- Technical:** HTML, CSS, PHP, MySQL
- Economic:** Low-cost
- Operational:** User-friendly
- Schedule:** Semester-based completion

Results & Testing

- Outcome:** Successful
- Testing:** CRUD, Validation

Conclusion

- Achievement:** Automation
- Objectives:** Completed

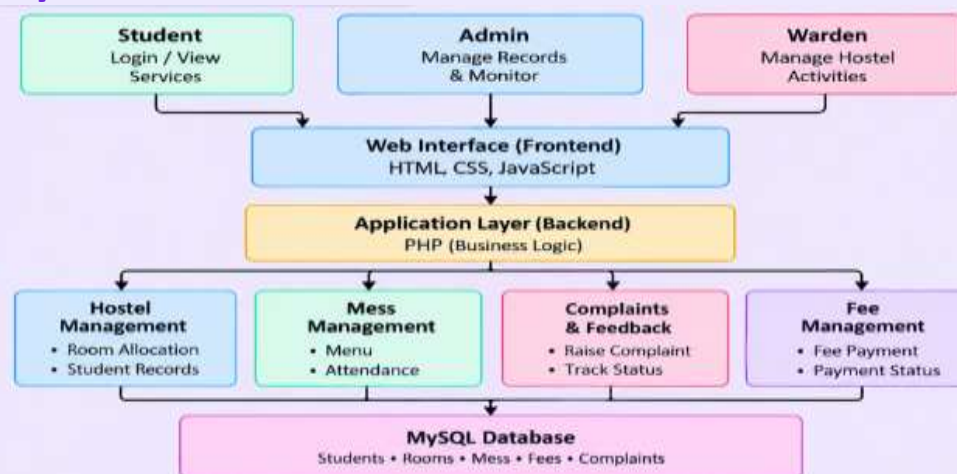

Future Scope

- Enhancement 1:** Mobile App
- Enhancement 2:** AI Analytics

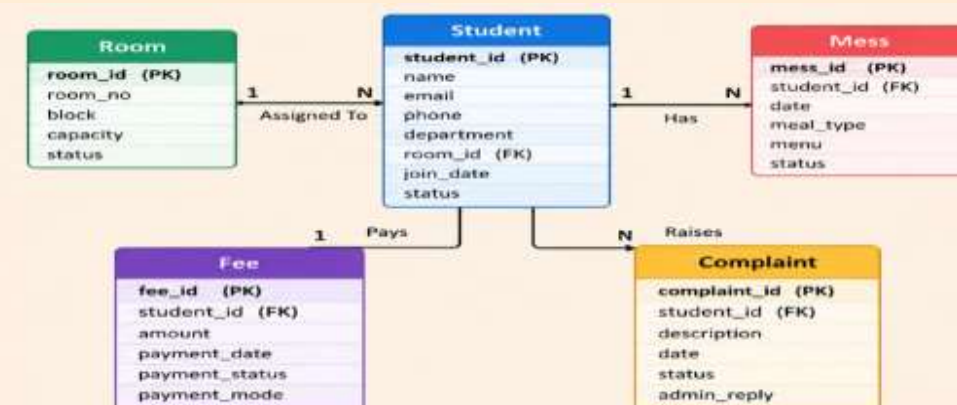

Tools & Technologies

- Frontend:** HTML, CSS, JavaScript
- Backend:** PHP / Java / Python
- Database:** MySQL
- Development Tools:** VS Code, XAMPP
- Additional:** Git/GitHub, Web Browser
